# **Your Environment As Your Larger Energy Body**

*Presented by Patty Dunks*

Looking through the lens of the Brennan Healing Science® 4 dimensional model of healing, we will look at and discuss how the internal and external environment contribute to and facilitate the disease process. Students will be given additional diagnostic tools as healers to help facilitate our clients' maintaining and achieving the frequency of healing and well-being.

We will look at:

- How our environment can affect our health and well-being
- How our environment can impede the healing process, energetic blocks in the physical site, earth radiation, research into earth streams, electromagnetic pollution
- How our body reflects the Human Energy Field and is our larger Energy Body
- Cures and Fixes: Tools to raise the frequency in our environment, energetic clearings of the site, use of essential oils, map dousing a site
- Evidence-based research into the effect of our environment on our health and well-being

**Patty Dunks**, B.A., Sociology; BBSH Graduate, 1999; Certified Feng Shui consultant; Landscape designer and contractor, 30 years; Past-life therapist; Teacher, Cabrillo College; Healing gardens/horticulture therapy.
